## PROFESSIONAL SUMMARY

A self-driven professional developer with two years of hands-on industry experience and certifications from UDEMY. Passionate about technology and eager to align expertise with organizations focusing on sustainability. With strong creative and analytical skills, I leverage my tech stack to surpass goals. A collaborative team player with a meticulous eye for detail, I am ready to contribute dynamic solutions to forward-thinking teams committed to positive impact.

## EXPERIENCE

**SOFTWARE DEVELOPER •** AUG 2022 - PRESENT

Thrymr Software Pvt.Ltd. - Lucknow

As a Full Stack Software Developer at Thrymr, I'm playing a pivotal role in crafting the architecture and user experience of our software applications. Leveraging my expertise in Angular, React, and Spring Boot, i am part of a dynamic team that thrives on collaboration, innovation, and a commitment to excellence.

**Key Responsibilities:**

**Frontend Development:** Develop responsive and visually appealing user interfaces using Angular and React. Implement and maintain features that enhance user experience and usability.

**Backend Development**: Utilize Spring Boot to design and implement robust server-side logic, ensuring high performance and scalability. Work on data integration, APIs, and server-side architecture.

**Full Stack Expertise:** Bridge the gap between frontend and backend development, ensuring seamless integration and optimal functionality of the complete software stack.

**Collaborative Problem Solving:** Collaborate with cross-functional teams, including UI/UX designers, product managers, and other developers, to translate requirements into technical solutions.

**Innovation and Best Practices:** Stay abreast of industry trends and best practices. Contribute to the adoption of new technologies and methodologies to enhance our development processes.
